Title: Bumpers for 2003 Convertible

Bumpers for 2003 Convertible

The last year of production for the early 9-3 body design Convertible had two variants, the “SE” bumpers and the Aero design which was the same as the Viggen design. Please see the below photo for a visual reference.

Saab 9-3 SE Convertible

The Saab 9-3 SE Convertible is generously equipped with 16-inch alloy wheels, side skirts and spoilers. Inside, the leather-faced upholstery is matched with a burled walnut instrument panel. If you want to give your car a more distinctive personal appeal, you can choose the Design Package with dark red interior accents on the black leather to contrast with the black or silver exterior paint. A sophisticated chassis and a 205 horsepower turbo engine promise a thrilling driving experience – every time.

Saab 9-3 SE Convertible Sport Package

The 9-3 SE Convertible with Sport Package is the car that has more of everything: more attitude, more sportiness and more equipment. 17-inch wheels and deep spoilers and skirts give the car a low, aggressive stance. Leather-faced sports seats and sport steering wheel are just some examples of the additional equipment included in this optional package.

*See page 32 for information.

**2003 9-3 Convertibles were built with two different bumper styles.
On the left is an “SE” standard bumper.
On the right is the optional “Sport Package”
which is referred to in EPC as “Aero”, (same bumpers as the Viggen).**
